USEFUL TIPS

The Sea Post is fully assembled. Use this guide to properly attach the product to the intended surface.

Carefully un-box the product. To prevent scratching, avoid using sharp blades when removing plastic wrapping. Lay a blanket or soft cloth on your work area to prevent damage during assembly.

Do not to over-tighten hardware. Always check for proper alignment before fully tightening hardware.

TOOLS

- » Level
- » Drill & Drill Bits
- » Wrench
- » Safety Gloves & Glasses

CONNECTIVITY

- » 4x4 Pedestal – Water Connectivity
- » 6x6 Pedestal – Water & Electrical Connectivity (Electrician Needed)

SAFETY FIRST

Always wear task appropriate protective gear such as OSHA-approved glasses, gloves, work boots, etc. Make sure you have all supplemental materials, including hardware and parts prior to beginning. Always follow instructions. Remember: Improper use of tools or hardware may result in damage to the product or personal injury.

MOUNTING HARDWARE

Wood/Composite Surface
» Lag Screws (4)
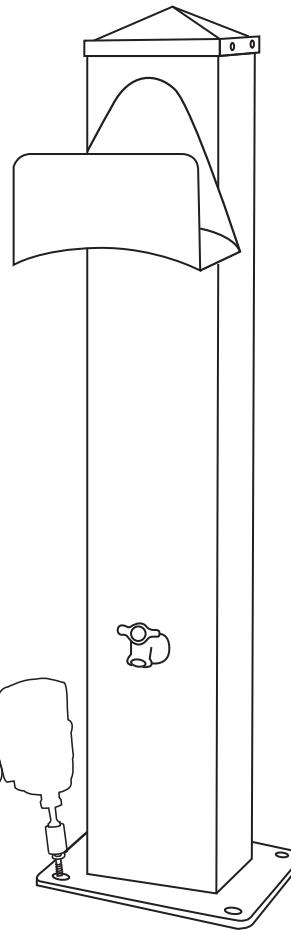

Concrete Surface
» Anchors or Concrete Screws (4)

1 Drilling Pilot Holes

STEPS

» Position the sea post frame on the mounting surface. If necessary, make sure the mounting surface is reinforced.
» Mark the position of mounting holes and drill pilot holes for the hardware.

2 Securing the Sea Post

HARDWARE
» Hardware Detail A

STEPS
» Follow hardware detail A.
» Insert the hardware through the mounting holes and partially tighten into the pilot holes
» Fully tighten to secure to the mounting surface.

FINAL CHECK

Check that all hardware is securely fastened and the sea post is stable before use.
